

# DLL is the trusted business partner for your assets over the entire lifecycle.

## Who are we?

As a global asset finance partner, DLL delivers specialized knowledge and expertise to several distinct industries. DLL's services range from Stock Finance to leasing solutions, and remarketing of used equipment. A wholly owned subsidiary of the Rabobank Group, DLL has delivered support to customers in more than 25 countries for 50 years.

## The benefits you can enjoy

### Self-service reporting

DLL offers our customers a Customer Asset Portal (CAP) as self-service Kiosk to manage their contracts on asset level, no matter the asset type or brand. We understand that not every fleet is financed through just one partner. Therefore, CAP enables our customers to manage all assets in their fleet, regardless of ownership, and helps with information security.

### All-in-One

DLL offers our vendor partners access to their portfolio reports at any time. CAP can be customized and branded with the vendor logo, and each user can set views and download reports. We have you covered when managing access for your rental customers or single lessee end-users, as your all-in-one platform.

### Real-time Insights

With integrated Telematics data, CAP serves as fleet monitoring dashboard with daily utilization updates to streamline asset management and business operations across the many different asset types, brands and telematics systems in a single dashboard.

Customers keep track of their assets' performance and health condition over their entire life cycle. It supports warranty handling, and enables value-added digital services for connected assets.

### Avoid surprises

Receive notifications before an asset reaches the maximal allowed usage to take action early. Our DLL-Team will help you identify your best options at the end of lease.

## Pay-per-Use

Enabled with telematics, Pay-per-use allows customers to match payments with usage, and pay for productivity rather than carry fixed costs and high administrative burdens. Instead of large up-front acquisition investments or recurring fixed costs, Pay-per-use solutions align expenses to activity, allowing businesses to pay for equipment based on the work performed.

More about our Pay-per-Use financing [here](#).

## DLL Equipment Showroom

Our zero-fee auction and sales platform allows you to bid and buy with confidence on fully inspected assets, with clear inspections and photos, alongside other verified buyers worldwide. With a global reach, you have access to quality equipment, and we can arrange transport for you. At DLL we have our own equipment available from the end of lease and default activities in stock, making us your go-to destination for all your purchasing needs.

- 0% Commission and 0% Fees to DLL
- No Deposit Required
- No Intermediaries, DLL or its subsidiaries owned assets only
- Inspected by our industry experts
- Services such as worldwide delivery and financing available
